

Pre-fit impact on  $\mu$ :

$\square \theta = \hat{\theta} + \Delta\theta$      $\square \theta = \hat{\theta} - \Delta\theta$

Post-fit impact on  $\mu$ :

$\blacksquare \theta = \hat{\theta} + \Delta\hat{\theta}$      $\blacksquare \theta = \hat{\theta} - \Delta\hat{\theta}$
